

D7.6 Ethics Report – Executive Summary

Factory2Fit will follow the principles of responsible research. The responsible research approach is coordinated by VTT. To guide partners to responsible research practices, this Ethics Report gives detailed guidance on:

1. Procedures for ethics authorizations for the research with humans. When is the authorization needed and how is it applied for.
2. Procedures and criteria that will be used to identify/recruit research participants, including measures that will be taken to prevent the risk of enhancing vulnerability/stigmatisation of individuals/groups.
3. Informed consent procedures that will be implemented for the participation of people as well as templates of the informed consent forms and the information sheet to be delivered to participants.
4. Policy that will be used for incidental findings.
5. Procedures for collection and processing of personal sensitive data.

The Ethics Report will be updated as the project proceeds and the guidance will be detailed.
